

Said Rasidin

Data Scientist / AI Engineer
Jakarta, Indonesia | [Linkedin](#)

Machine Learning Engineer with broad experience in developing scalable AI systems, recommendation engines, forecasting models, and intelligent automation pipelines. Skilled in Python, PyTorch, Azure AI, Microsoft Fabric, vector databases, and modern data architectures. Certified Google Professional ML Engineer and Azure AI Engineer Associate, with strong ability to transform complex data challenges into impactful, production-ready AI solutions.

Work Experience

TenEleven.ai | Jakarta, Indonesia July 2025 - Present

Data and AI Consulting Firm.
Senior Machine Learning Engineer

- Architected and delivered production-grade AI solutions across conversational AI, agentic systems, and data-driven applications, ensuring scalable and efficient deployments for enterprise clients.
- Designed and implemented end-to-end conversational AI platforms for a global automotive client, incorporating tool calling, API orchestration, state management, and automated workflows.
- Developed and evaluated Proofs of Concept (PoCs) including Chat-with-Data systems, agentic DevOps assistants, voice-enabled AI agents for real-time Q&A, and conversational analytics tools with dynamic dashboard generation.
- Created advanced agentic AI architectures, including Agentic RAG, autonomous task-oriented agents, and multi-step reasoning pipelines, to enable complex decision-making and operational efficiency.

Stack: Azure, AI Foundry, AI Search, Dify, Microsoft Agent Framework, Databricks, Microsoft Fabric

Tribun Network - KG Media | Jakarta, Indonesia August 2024 - June 2025

One of the largest local news networks in Indonesia.
Data Scientist

- Developed a personalized advertorial ranking strategy to increase page views and optimize content delivery.
- Researched and implemented hierarchical text classification (HiDEC) using PyTorch to standardize news categorization across the Tribun Network.
- Applied large language models (LLMs) for automated data labeling and conditioning, improving data quality and eliminating manual annotation effort.
- Built and deployed a Trending Topics feature and an internal image search system to enhance content discoverability.
- Designed and implemented tags and article recommendation systems, enhancing user engagement and click-through rates across the entire Tribun Network.
- Optimized a recommendation system by integrating Qdrant vector database with caching mechanisms, reducing CPU usage from 95% to 20% and improving delivery efficiency.
- Streamlined an entity extraction pipeline using BERT, reducing daily processing time from 2 hours to 15 minutes – an 87% improvement

Technologies and expertise: PyTorch, Ollama, MongoDB, Qdrant, ElastiCache, Athena, FastAPI, Autoscaling

Praktis.co | Jakarta, Indonesia November 2021 - July 2024

Praktis is an end-to-end supply chain startup enabler for local brands.
Data Scientist

October 2022 - July 2024

- Built forecasting models with Vertex AI AutoML, enabling rapid development of ML systems for simulated forecasting.
- Implemented text similarity search using word embedding and cosine similarity to align product categories across online marketplaces.
- Collaborated with academic experts to formulate optimization models aimed at enhancing production scheduling efficiency, implemented using Pyomo, Lingo, and also developing heuristic algorithms in Python
- Developed Min-Max inventory monitoring logic and visualized using Metabase to enhance inventory management and out-of-stock prevention
- Pioneered the development of advanced demand forecasting models using Python orchestrated by Airflow for batch inference, ensuring effective inventory management.

Technologies and expertise: Python, Airflow, BigQuery, Lingo, Pyomo, Vertex AI

Data Analyst November 2021 - October 2022

- Custom-engineered Google Sheets and Postgres operators using Airflow Hooks for seamless data integration into the production environment - Cleaned and migrated data into a BigQuery data warehouse for BI dashboards, achieving lower response time dashboards - Conducted ad-hoc requests (complicated queries, data cleaning, data migration)	
Technologies and expertise: Python, Airflow, BigQuery, Metabase	
Jakarta Smart City (JAKI) Jakarta, Indonesia	August 2021 - October 2021
Jakarta Innovation Laboratory, a connector for citizens and the government.	
Data Science Trainee (Internship)	
- Researched a Few-Shot Learning method to categorize CRM report images and improve model flexibility for new target classes without re-training. - Deployed prototype model for serving web app and prediction API. - Getting insight how big data can be implemented in the various sectors to improve the quality of life of the citizens	
Technologies and expertise: Python, Heroku, PyTorch	
Pusat Penelitian dan Pengembangan Geologi Kelautan (PPPGL) Bandung, Indonesia	August 2019 - October 2019
Indonesia Center for marine geological research and development	
Thesis Project (Research Intern)	
- Conducted end-to-end marine seismic data processing, including pre-processing, Post-Stack, and Pre-Stack Kirchhoff Time Migration (PSTM) to extract insights into subsurface geological structures. - Implemented seismic multiple attenuation using Surface Related Multiple Elimination (SRME) and Radon Transform, producing a cleaner and higher-resolution seismic image. - Delineated subsurface geological structures beneath the Seram Sea through seismic interpretation and analysis.	
PT Timah Tbk Pangkal Pinang, Indonesia	September 2019 - October 2019
The largest tin mining company in Indonesia.	
Geophysicist Intern	
- Conducted magnetic and geoelectrical surveys to identify and map potential tin ore deposit zones. - Processed magnetic and geoelectrical datasets to generate geomagnetic anomaly maps for exploration target areas. - Interpreted geomagnetic anomaly maps to delineate primary tin ore deposit boundaries.	
Skill	
Technical Skills: Python, SQL, BigQuery, Databricks, PyTorch, Pyomo, Lingo, git, FastAPI, Docker, Airflow, GCP (Vertex AI, BigQuery, Cloud Run, GCS), AWS (EC2, Athena, S3, QuickSight, MWAA). Soft Skills: Self-starter, can-do attitude, always curious, innovative, clear communication Languages: Indonesian, English (C1 Advanced) Comfortable with: Machine Learning Modeling, Deep Learning, Automation, Optimizations, Data Analytics.	
Education	
Universitas Jambi, Indonesia	August 2015 - March 2020
Bachelor of Engineering in Geophysical Engineering	
Organizations: HMTGF UNJA (Head of External Division), SEG UNJA (Board Member), HMGI Wilayah 1 Sumatera (Member of Research and Technology Division)	
Certification	
Databricks Certified Generative AI Engineer Associate	April 2026 - April 2028
Azure AI Engineer Associate	September 2025 - October 2026
Google Professional Machine Learning Engineer Certification	September 2024 - September 2026
EF SET English Certificate 66/100 (C1 Advanced)	

Volunteering

Yayasan Anak Bangsa Bisa (Gojek)

June 2022 - August 2022

Data Analyst Mentor

- Guided two student groups in Kampus Merdeka Capstone Projects, focusing on dashboard development and data insights
- Shared industry expertise to enhance students' understanding of data analysis practices
